ABOUT ME

A fantasy and science fiction author turned developer, experienced with both frontend and backend technologies.

PROJECTS

WATER MY PLANTS, *Backend & React II Developer* ⧉
Backend Repo ⧉ **| Frontend Repo** ⧉
Water My Plants is a web application which allows for users to register and login to a personal account, wherein they are able to manage a list of owned plants (species, names, watering frequency).

Backend Tech: NodeJS | Express | bcrypt.js | JWT | knexJS | PostgreSQL | Jest | Supertest

Frontend Tech: ReactJS | Context | Axios (with token auth) | React-Router-Dom | Styled-Components | Figma | Zeit CLI

Tasks:
(BACKEND)
- Built out tables and seed data with knexJS
- Set up endpoints (registration, login, etc.) following REST principles
- Implemented security protocols for registration and login routes using JWT and bcrypt.js to hash passwords
(FRONTEND)
- Used contextAPI on frontend to manage state
- Built out protected routes to use in conjunction with React-Router-Dom, to protect visibility of potentially data-sensitive routes
- Designed team UI for frontend and landing page (using Figma)

DISTANCE FITNESS, *UI Developer* ⧉
Marketing Page Repo ⧉ **| Deployed Site** ⧉
Distance Fitness is a web application which serves as a fitness journal for users.

Tech Used: HTML | LESS | Git | GitHub | Netlify | Trello

Tasks:
- Created UI templates for team to choose between
- Created a fully responsive landing and about page, including the Distance Fitness logo and text content

SKILLS

UI:
HTML | CSS | LESS

LANGUAGES/LIBRARIES & FRAMEWORKS:
JavaScript | React | Redux | NodeJS | Jest | Supertest | React Testing Library | Express | SQL | KnexJS | PHP | Laravel | Symfony | Python

OTHER TECH & SKILLS:
SQLite3 | PostgreSQL | Trello | Asana | Figma | Git | GitHub | Zeit CLI | Heroku | Agile and Scrum workflows

PROFESSIONAL EXPERIENCE

JellyWhat, *PHP Developer*
09/2019 – 11/2019
Fort Walton Beach, FL
- Implemented small bug fixes, assigned tasks to other employees via Asana, and built out features for the company's "point-of-sale" repo.

EDUCATION

Lambda School - Graduated,
Full-Stack Web Development
12/2019 – present | Remote
Lambda School is highly immersive (full-time, 40+hrs/week), 9 month accelerated program, with its primary focus being on teaching its students job-specific development skills, including computer science, software engineering, and web development.
